DPAPI user Master Key analysis

Decoded structure of the Master Key

Step 2/2

The list below contains decoded entries of the MasterKey file. Right-click the list to display the context menu. You can use a simple wordlist to bruteforce the initial logon password the Master Key is protected with.

| Attribute name         | Data   |
|------------------------|--|
| dwVersion              | 2  |
| szGuid                 | 6cdd0a92-eacc-4a6a-9af5-263ba1afdbf5                       |
| dwPolicy               | 0  |
| dwUserKeySize          | 136  |
| dwVersion              | 2  |
| pSalt                  | 361C840104285D6526D940203EA51817                           |
| dwPBKDF2IterationCount | 18000  |
| HMACAlgId              | 8009   |
| CryptAlgId             | 6603   |
| pKey                   | 7C950848B3A38309319900617C364B2FCC34DC56C4E3C90650CBBA7... |
| dwLocalEncKeySize      | 104  |
| dwVersion              | 2  |
| oSalt                  | 678B7D1B374A0F7CA14CE1F00EC97A42                           |

out.dat.

DPAPI offline decoder

  **User/system credentials needed for successful blob decryption** Step 3/4

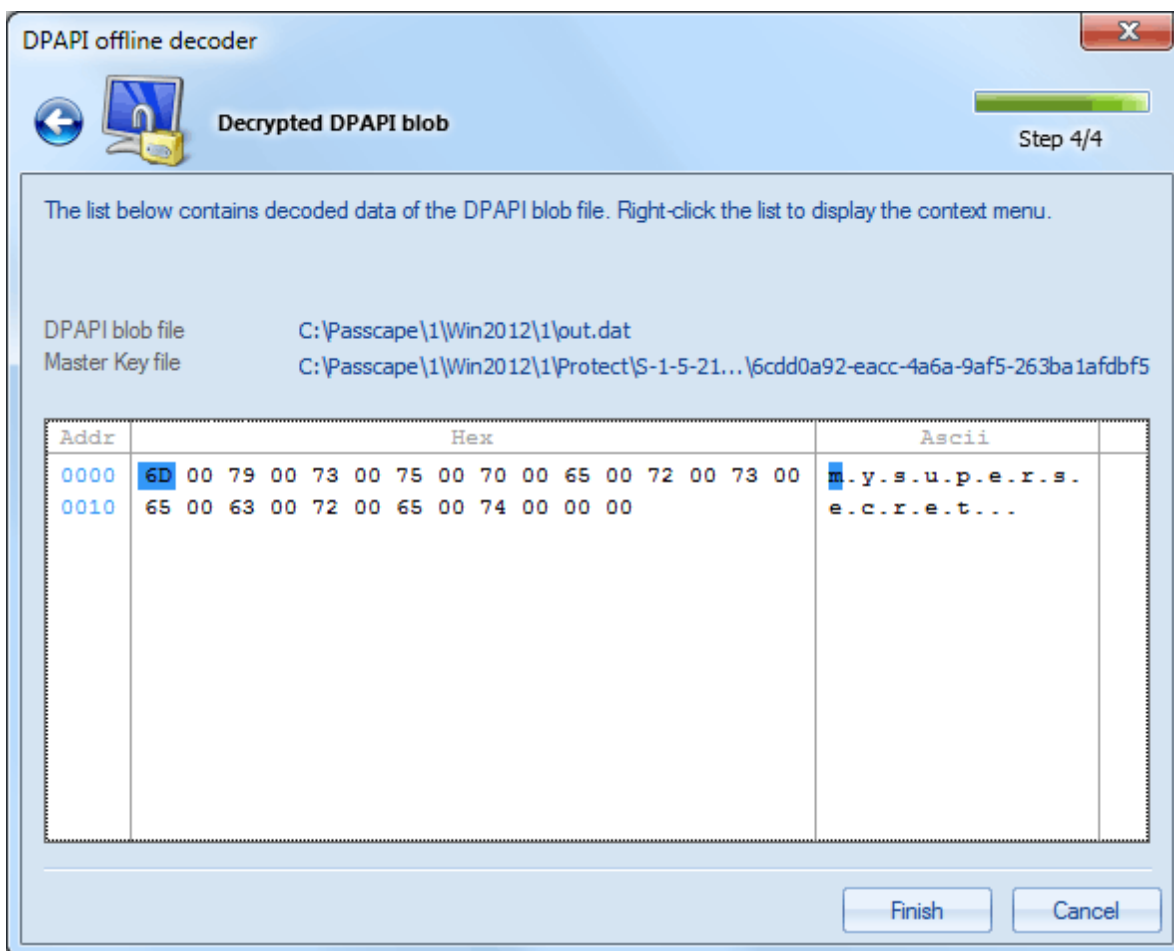

You should specify user SID and user logon password here in order to decrypt the DPAPI encrypted data. However some DPAPI encrypted blobs, eg. encrypted using SYSTEM account, require machine credentials. In this case, you'll have to provide a path to the SYSTEM and SECURITY registry files. Optional entropy file is required when the blob was created using entropy (refer to CryptProtectData API for more information). You should manually create a simple binary file with the entropy data and show the program path to the file.

**Additional parameters required for successful data decryption**

|                         |   |
|-------------------------|---|
| User SID                | <input type="text" value="S-1-5-21-701907226-2620735803-3448339090-1607"/>  |
| User logon password     | <input type="password"/>  |
| NTDS.DIT                | <input type="text" value="C:\Passcape\1\Win2012\1\ntds.dit"/>  |
| SYSTEM                  | <input type="text" value="C:\Passcape\1\Win2012\1\SYSTEM"/>    |
| SECURITY                | <input type="text"/>   |
| Entropy file (optional) | <input type="text"/>   |

NTDS.DIT SYSTEM, SID
